## Southwestern Industries, Inc. TRAK CNC Turret Specifications

## Specifications

- Servo Motor - high-performance, very rugged DC brushless servo, thermally protected.
- Heavy Duty Reducer - capable of handling impact loads 5X its rating, over 1000 times.
- Belt Drive - isolates impact loads from the reducer during accidental tool crashes.
- Absolute Position Encoder - guarantees correct tool position every time, non-contact.
- Coupling - 3-piece Hirth design, high stiffness and accuracy, no movement during index.
- Main Body - thick wall cast iron, provides excellent vibration dampening during cutting.
- Clamp Cylinder - clamps with 1275 lbs of clamping force (@ 90 psi air supply), allows coupling to skip teeth during accidental tool crash without causing damage to the unit itself.
